CERTIFICATIONS

PROFILE

- **Experienced Software Developer / Architect with 15+ years of experience** in implementing software by using Microsoft platform. Certified .NET, Azure and Dynamics CRM Professional

WORK PERMIT

C permit, since 2013 in Switzerland

TECHNICAL SKILLS

.NET / C# (15+ years)
Azure Architecture and development (5 years)
Azure Devops / Git (6 years)
ASP.NET / MVC (5 years)
Microsoft CRM Dynamics (4 years)
HTML5 / CSS / JavaScript (8 years)
ASP.NET Web Forms (7 years)
SQL Server (10 years)

CURRENT POSITION

08/2025 - Present

Azure / Dynamics CRM Engineer at Zurich Insurance Kunden Portal (ZKP)

- Leading the infrastructure migration to Azure Landing Zone environment - Dynamics CRM, Azure Functions, Service Bus, Storage Account, SQL Managed Instance, Synapse etc.
- Bicep based infrastructure setup including workloads, data flows, networking, DNS and security. Leading the compliance and security reviews
- Developing and customising the Dynamics CRM (plugins, javascript, backend APIs)

PAST POSITIONS

12/2022 - 07/2025

Azure Lead Engineer (Freelancer) at Swisslife

- Leading and successfully finalized the implementation (coding + infrastructure) of the finance integration platform hosted in Azure
- Working on integration with multiple Swisslife systems via Azure Functions (.NET Core) / API Management / Application Gateway / Service Bus etc.
- Setting up the project infrastructure by using Terraform and Azure DevOps pipelines
- Implementing security aspects using OAuth (various flows), mTLS and RBAC
- Integrations with SAP / SAP4HANA / Dynamics CRM

12/2020 - 12/2022

Azure Lead Developer (Freelancer) at CreditSuisse Zürich

- Lead developer of the new bank-wide Azure based platform - Azure Functions, APIM, Azure Data Factory, AAD, OAuth.
- Building multiple integrations (mostly API) with various products - Dynamics CRM, Dynamics F&O, third party document and property management products
- High-responsibility position of leading the architectural and development decisions for the newly developed projects in a hybrid environment - infrastructure architecture (VPN, Firewalls, NAT), security architecture (OAuth, TLS, Certificates,

Api Gateway), technical architecture (DevOps pipelines, coding best-practices) and people management (leading an off-shore team)

12/2019 - 11/2020

Software Developer (Freelancer) at Rothschild & co Bank Zürich

- Supporting the existing core application (CIS) used by all the branches of the Bank for customer on-boarding and compliance procedures. Web Development (.NET/WCF/Javascript), immediate customer support by directly interacting with bank employee users, various integrations (ASP.NET Web Api / React/Avalog) between the main bank systems.

06/2019 - 11/2019

Software Developer (Freelancer) at Zurich Insurance

- Developing/integrating the existing CRM Application (ZKP) used by more than 3000 company employees. Plugins (.NET/C#), customizing (React/Typescript/Javascript), various integrations (ASP.NET Web Api / Windows Services) in a very dynamic development environment - Azure Devops, thoroughly reviewed git pull requests and test driven approach

09/2018 - 05/2019

Software Engineer at Swisslife AG

- Member of an agile team (6 Engineers) developing and maintaining the core software tool of Swisslife (**myClient**), being used by all the swiss-based agencies to sell the company products (3. Seule, life insurances, investment products), maintain private customer portfolios and managing the leads.
- Integrating 3rd party products (non-life insurances, bank investment products) in **myClient**
- Applying the best-practices for coding, security and performance by using .NET Classic / .NET Core services with OAuth, Azure DevOps shared Nuget packages / Git / Deployment pipelines, Unit Tests, ASP.NET MVC / Knockout/ Typescript

10/2015 - 08/2018

Senior Dynamics CRM Developer / .NET Consultant at adesso Schweiz AG

- Developing from scratch complete Dynamics CRM solution for Stromsparfonds Basel (reporting, controlling, document printing, scanning and generation) taking care of more than 100.000 inhabitants / companies of Kanton Basel in a very short deadline (10 months).
- CRM Development and Customization, Deployment planning, NUnit Tests, Mobile App integration for Medgate Telemedicine CRM Solution used by Asian customers
- Integrating 3rd party APIs with Dynamics CRM (Emarsys, Survey Monkey)
- Providing architecture design and solutions for complex problems (printing documents in background, storing hundreds of thousands of documents, generating thousands of documents in one shot)
- Setting up continuous CRM build environment based on TFS Build Server, CRM Solution Packager, NUnit Tests, Mocking CRM Framework and Powershell scripts throughout all the projects on the company level
- Providing support for other CRM solutions in banking and trade businesses (Swisslife)

10/2012 - 09/2015

Lead .NET Developer / AngularJS Developer at ipAppMedia AG (Swisscom)

- Developing and providing onsite support for .NET based Swisscom TV 1.0 and TV 2.0 platform backend.
- Immediate technical support (max 24h response time)
- Continuous improvement of the TV platforms through code and database optimizations
 - analysing activity logs

- cleaning up historical / redundant data (ex. building mechanism for cleaning up streaming platform which saves about 24-25% of space, equivalent of several TB of fast HDD every month).
- Implementing and launching security features (ex. Login) using ASP.NET MVC (+800k mobile and web customers)
- Building core API module used by the Swisscom HTML5 / AngularJS TV Web client and other Swisscom websites
- Successfully leading and managing a team of developers (6 .NET Developers)
- Delivering quality code in the expected timeframe
- Implementing and maintaining a list of 12 Mediaroom applications (used by 1 million TV customers) planned in quarterly releases.

02/2005 – 09/2012

Owner of Kettle Solution software company – www.ketlsolutions.com

- 7 years of leadership, complex decisions and varied projects (5 large Windows & web solutions in insurance, marine, engine manufacturing or agriculture businesses and 10+ medium or small applications)
- Leading a solid team (5 .NET Developers + 1 QA Engineer + 1 Designer), providing technical & architecture decisions. Estimating and planning the development steps upon customer requests using Agile methodologies.
- Participating in the development of complex modules like accounting, reporting, booking systems, maps or document generation.
- Successfully developed multiple applications on demand for various international customers using Microsoft .NET platform –
 - customer support platform in Insurance business (Holland, 1.5 years) (www.finfin.nl), that generated 600k+ revenue to the client.
 - CRM system for Port administration (France , 3 years)
 - management portal for Agriculture companies (US, 2 years)
 - system for engine management used by Detroit Diesel Corporation engineers (US, 3 years)
 - various other smaller projects (see the project details on my LinkedIn profile).
- Actively participating in the improvement of client businesses by proposing solutions and providing high-quality deliveries in tight deadlines.

04/2002 – 01/2005

Web Developer at Romedchim Romania. Working with ASP.Net Webforms / Sql Server/ Crystal Reports to implement solutions on demand for US customers.

MS: Azure Administrator

ISAOB: Certified Professional for Software Architecture Foundation Level

MS: Microsoft Dynamics CRM Customization and Configuration

MS: Microsoft Dynamics CRM 2016 Online Deployment

MS: Microsoft Dynamics CRM Application

MCSA: Web Applications

MS: Programming in HTML5 with JavaScript and CSS3

Professional Scrum Master I (PSM I)
